

Siemens Gamesa Automates Blade Inspections with SkySpecs Drones

**SIEMENS GAMESA
RENEWABLE
ENERGY AND
SKYSPECS HAVE
SIGNED AN
AGREEMENT FOR
AUTONOMOUS
DRONE
INSPECTIONS OF
SIEMENS GAMESA
WIND TURBINE
BLADES BOTH
ONSHORE AND
OFFSHORE.**

The agreement was signed on Tuesday, 26 September, during the Global Wind Summit in Hamburg.

SkySpecs, a provider of robotic solutions for the wind energy industry, has so far inspected and analyzed over 33,000 wind turbine blades. The company's fully automated drone solution comprises the flight automation software on the drone and Horizon, cloud-based data analytics, management, and planning software.

Earlier this summer, SkySpecs [carried out](#) blade inspections on Ørsted's Burbo Bank Extension wind farm off the coast of Liverpool Bay, UK.
