

SkySpecs Automated Robotic Inspections

The Fastest, Most Precise Blade Inspection on the Market

SkySpecs' inspections remove human error and enable a fast, accurate, and safe inspection that minimizes downtime and provides high-quality, easily accessible data on your critical assets.

[Learn More About Our Inspections](#)

Drone takes 3D model of turbine in real time

Stop turbine in single orientation without pitching the blades

Camera settings adjust automatically, without human input

Flies in up to 15 m/s steady winds

Data is automatically uploaded to the cloud; data is viewable immediately after uploading to Horizon

Onshore and Offshore Experts

100,300+

Wind turbines
inspected to date

1,235+

Unique wind farms
inspected globally

24

Record for Offshore
Inspections per day

35

Record for Onshore
Inspections per day

95%

Reduction in downtime
compared to a
manual inspection

30

Countries in which
we work today
